7. Previously Cancelled

8. (Third amendment) An integrated power source unit for a telecommunications device comprising;

a power source unit housing adapted to be received by a telecommunications device, the telecommunications device including a substantially parallelepiped housing having a front face, a back face, a first and a second side face, a top end face and a bottom end face;

a lens located in the wall of the power source unit housing in a location wherein when the power source unit housing is received by the telecommunications device, the lens is positioned within the bottom end face;

a source of illumination located within the power source unit housing and positioned to project a beam of light through the lens to illuminate an area surrounding the telecommunications device with sufficient candlepower to enable a user to view the area; and

a power source for the source of illumination in electrical communication with the source of illumination wherein the power source and source of illumination are connected in a closed circuit, the closed circuit being located entirely within the power source unit housing.

9. (Once amended) The power source unit of claim 8 further comprising a switch

in electrical communication with the power source and the source of illumination.

10. (Originally Filed) The power source unit of claim 8 wherein the source of illumination is an incandescent light bulb.

11. (Originally Filed) The power source unit of claim 8 wherein the source of illumination is an light emitting diode.

12. Previously Cancelled

13. (Originally Filed) A cordless telephone comprising the power source unit of claim 8.

14. Previously Cancelled

15. (Originally Filed) A cellular telephone comprising the power source unit of claim 8.

16. Previously Cancelled

17. Previously Cancelled.

18. Previously Cancelled.

19. Previously Cancelled

20. (Previously added and Once Amended) The power source of claim 8 wherein the source of illumination is capable of generating from 0.1 to 30 lumens.
